

A SCALEDLEARNING BOOK

Context-Driven

Building the shared context that makes AI agents useful

By Jonathan Davis

Why your organization's captured knowledge and context matter more than the model, and how to build them so agents can take on routine work reliably.

WHAT YOU'LL LEARN

- Capture the tacit knowledge your organization runs on
- Structure context so agents can use it
- Keep shared context current as work changes

CONTENTS

01 From data-driven to context-driven
02 What context really is
03 Capturing tacit knowledge
04 Context for retrieval and agents
05 Keeping context current
06 The context-driven organization

Edition preview. The full edition will be delivered to this email address when released.
